SOCIETY REPORTS.

NEW YORK NEUROLOGICAL SOCIETY.

Meeting of December 1, 1891: Resection of Posterior Branches of Spasmodic Torticollis, with Report of a Case. 78

Meeting of January 5, 1892: Thomson's Disease—Peripheral Neuritis, or Possible Lesions of the Posterior Nerve-Roots—Spasmodic Screaming—Debate on the Therapeutic Value of Hypnotism 159

Meeting of February 2, 1892: Pachymeningitis and Myelitis—The Surgical Treatment of Epilepsy 301

Meeting of March 1, 1891: Hysteria in a Child—Morvan's Disease—The Diseases and Conditions to which the Rest Treatment is Adapted 375

Meeting of April 5, 1892: On the Present State of Treatment of Chronic Diseases of the Spinal Cord, Especially of Tabes and Neurasthenia 445

Meeting of May 3, 1892: Acquired Myotonia—Live Issues in Neurology—Observation on the Excretion of Uric Acid. . . . 559

Stated Meeting, June 7, 1892: Primary Myopathy—Heteratopia of the Cord 660

Meeting of November 1, 1892: A Case of Spasmodic Wryneck—A Study of Some of the Drugs Used in Functional Nervous Disorders—The Nervous Origin of Jaundice. 949

PHILADELPHIA NEUROLOGICAL SOCIETY.

Meeting of October 26, 1891: A Study of the Medications for, and Application of, Physical Culture in the Treatment of Insanity and Allied Diseases—Railway Back—A Case of Meningeal Tumors of the Prefrontal Region, with late Pulmonary Tuberculosis, and a History of Syphilis—Hemorrhagic Tumor of the Pituitary Body and Infundibulum, in a Case of Pernicious Anæmia—Hysterical Rhythmical Chorea, Contractures, and Anæsthesia of Long Standing—A Cure of Great Improvement Attributed to a Visit to Lourdes—Note on the Irregular Distribution of Anæsthesia in the Face in Cases of Otherwise Complete Hemianæsthesia. 83

Meeting of November 25, 1891: Two Cases, Brothers, of Friedreich's Ataxia, Associated with Symptoms of Spinal Chorea—A Case of Friedreich's Ataxia—Neuritis of the Sacral Plexus and Some of its Branches, and Subsequent Polio-

myelitis, the Result of Difficult Labor--Violent Hystero-Epilepsy and Hystero-Chorea of Thirty Years' Duration—Extraordinary Rotatory, Whirling, Threshing, Clapping and Stamping Movements--Distended Infundibulum and Absorption of the Optic Chiasm in a Case of Internal Hydrocephalus. 166

Meeting of December 28, 1891: A Case of Acromegalia--The Patient Exhibited--A Case of Acute Myelitis of the Dorsal Cord--Exhibition of the Patient . . . . . .

Meeting of January 25, 1892: Abstract--A Further Report upon the Use of Bromide of Ammonia and Antipyrine in Epilepsy --Treatment of Epilepsy by Antifebrin and Sulphonal--Report of Autopsy on a Case of Thoracic Aneurism in a Patient Presented to the Society for Diagnosis Some Months Before Death .307

Meeting February 22, 1892: A Case of Hemiplegia, following Penetrating Wound of the Brain, with Recovery--Influences Modifying the Occurrence of Certain Nervous Diseases in the United States—Locomotor Ataxia in Negroes 317

Meeting of December 28, 1891: Cases of Unusual Forms of Spasm Reported from the Clinics of S. Weir Mitchell, M.D. 379

Meeting of March 28, 1892: A Case of Friedreich's Ataxia--Patient Exhibited--Probable Case of Syringomyelia--Specimens from a Case of Tumor, Probably Gliomatous, of the Cerebellum, Oblongata, and Pons, with Hydrocephalus and Hydrorachis—Insanity of the Puerperium - Some Clinical Features of Secondary Contracture in Bell's Palsy, as Illustrated by Three Cases 450

Meeting of April 25, 1892: Some Cases of Hysteria, with a Study of the Disturbances of General and Special Sensation . 564

BROOKLYN NEUROLOGICAL SOCIETY.

Meeting of December 9, 1891: Scientific and Executive Business. 92

AMERICAN NEUROLOGICAL ASSOCIATION.

Meeting of September 23, 24, 25, 1891: The Pathology of Hysterical Anæsthesia, Illustrated by Two Cases, Showing Some Unusual Phenomena—Tumor of the Cerebellum, in which Trephining was done for the Relief of Pressure—Jacksonian Epilepsy; Trephining; Removal of Small Tumor and Excision of Cortex—Porencephalus, in which Trephining was done for the Relief of Local Symptoms; Death from Scarlet Fever; Exhibition of the Specimens—Tumor of the Mesencephalon, with Exhibition of the Brain—Paranoia, Presenting some Interesting Features—Deformity of the Palate in Idiots—The Virile Reflex in Relation to Clinical and Forensic Neurology. 142

Meeting of June 22, 23, 24, 1892: Researches upon the Etiology of Idiopathic Epilepsy—Sleep Movements of Epilepsy—Separate Provision for Epileptics, both Public and Private—A Further Contribution to the Pathology of Arrested Cerebral, Development—On the Extent of the Visual Area of the Cortex in man, as Deduced from a Study of Laura Bridgman's Brain—The Criminal Brain, Illustrated by the Brain of a Murderer—Folie a Deux, with Remarks on Similar Types of Insanity—A Case of Rapidly Total Motor and Sensory Paralysis, with Autopsy, showing Acute Myelitis mainly of the Dorsal Cord—A Case in which Exploratory Trephining and Ligation of the Vertebral Artery were Performed—Autopsy showing Gliomatosis of the Cerebellum, Pons, and Oblongata. with Hydrocephalus and Hydrorachis Opening in the Skull from Continued Pressure 644
